

Phoebe Manning

linkedin.com/in/phoebemanning · phoebe.manning8@gmail.com

Systems-minded Backend Engineer who partners with product teams to ship reliable, user-centric features at scale. Seeking roles where engineering rigor, user impact, and collaborative product culture drive technical decisions.

SOFTWARE SKILLS

Languages/Frameworks: TypeScript, JavaScript, Node.js, NestJS, Express.js, RamdaJS, Java
Cloud/Infra: GCP, AWS, Kubernetes, Docker
Data: MongoDB, Prisma, PostgreSQL
Observability: Datadog, New Relic, Kibana

RELEVANT EXPERIENCE

DIGITAL AID SEATTLE, *Remote Volunteer*

Software Developer / Venture Support, April 2026 - Present

- Working to support and monitor ongoing ventures to deliver quality solutions and continuously improve processes

CAREER BREAK, *August 2024 – December 2025*

Planned pause to prioritize family, rest, and intentional next-step planning; refreshing system design fundamentals and evaluating opportunities aligned with engineer-driven product culture.

FORMA (TWIC INC), *Remote*

Senior Development Engineer, May 2022 - August 2024

- Drove backend processing for pre/post-tax benefit accounts on the Banking Service team, partnering with engineering and product to deliver seamless account creation, reimbursements, reporting features, and more.
- Owned backend services processing 100K+ monthly transactions across two microservices; increased HSA funds transfer volume by 80% by designing idempotent check-transfer flows, reducing manual reconciliation effort for finance operations.

SAP CONCUR, *Seattle WA*

Software Development Engineer, August 2018 - October 2021

- Accelerated feature delivery by designing modular Node.js/RamdaJS components that abstracted third-party OCR, digital signing, and storage services.
- Led zero-downtime migration of 10M+ receipts across AWS S3 regions, improving retrieval reliability and security for international (EMEA) customers and standardizing data access.

ADA DEVELOPERS ACADEMY, *Seattle WA*

Software Development Student, February 2018 - January 2019

- Gained experience with Ruby on Rails, API design, TDD, and web site deployment. Created an Android application in Java for a solo month-long capstone project.

KANAAN CONSULTING, *Cambridge MA*

Systems Engineer, April 2016 – December 2016

- Monitored and deployed the Massachusetts Statewide Real Time Traffic Management (RTTM) System. The RTTM System is software that provides travel times to motorists using hybrid variable message signs and Bluetooth readers.

EDUCATION

B.S. in Mechanical Engineering - TUFTS UNIVERSITY - Member of Cum Laude Society
